Sequence 4, Application US/09103429A

Patent No. 6187558

GENERAL INFORMATION:

APPLICANT: Granados, Robert R

APPLICANT: Granados, Robert R

TITLE OF INVENTION: DNA and Related Products and Methods

TITLE OF INVENTION: ADDRESS:

CORRESPONDENCES:

ADDRESSEE: Brown, Pinnisi & Michaels, P.C.

STREET: 118 No. 6187558th Tioqa

CTITY: Ithaca

STATE: NY

COUNTY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     OFFRAILS SISTEM: TO LOUS MELLON SOFFWARE PATENTIN SISTEM: PETENTIN Release #1.0, Version #1.30 CURRENT APPLICATION DATA: B09/103,429A FILING DATE: US/09/103,429A FILING NEW INFORMATION: NAME: 34,390 FEEFENCE/DOCKET NUMBER: BTI-39 FEEFE

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

extensin-like protein - maize
C; Species: Zea mays (maize)
C; Species: Zea mays (maize)
C; Species: Zear-1995 #sequence_revision 12-May-1995 #text_change 29-Oct-1999
C; Accession: S49915
R; Rubinstein, A.L.; Broadwater, A.H.; Lowrey, K.; Bedinger, P.A.
Submitted to the EMBL Data Library, June 1994
A; Description: Pex genes: pollen-specific genes with extensin-like domains.
A; Reference number: S49915
A; Status: preliminary
A; Status: preliminary
A; Molecule type: DNA
A; Residues: 1-1188 <RUB>
                                                                                                                                                                                                                                                                                                                   965 TIVPTITITSVITSSTITITITVCSTGINSAGETISGCSPKIITITVPCSTSPSETA--- 1021
